TOTAL = gross weekly sales − recorded bill discounts − return credits. Return AMOUNT is net credit after the original discount; RATE stays historical. ADVANCE is not separately classified. Receipts and reversals are separate. BALANCE = verified opening + all signed journal movements; a negative balance means company owes client. · No dedicated color/die charge or advance allocation exists in PHP V1. Ordinary receipts are shown separately. · No separately recorded GST/non-GST classification exists in PHP V1. Clients and vendors are never combined. ·
